verified software

Logica becomes Verum ASD Partner

Logica and Verum have signed a partnership agreement, appointing Logica as a Verum Consultancy Partner. Under the agreement Logica will provide consultancy services for Verum's ASD technology and ASD:Suite software tools. To become a Verum Consultancy Partner, companies are required to have experienced software architects and designers trained in ASD and the ASD:Suite.

Logica is the largest organisation so far to join a small number of leading embedded software companies in Verum's partner programme. Anton van Gelderen, Logica's Competence Manager, Technical Software Engineering said, "*Logica is very strong in mission critical systems and we see Verum's technology and toolset as a way of extending our work in this demanding area.*" Logica has developed systems for industries such as aerospace (Galileo, European Space Agency), public safety (Storm Surge Barrier) and transport where software reliability is a major concern. "*Verum's ASD:Suite will enable us to provide our clients with high reliability systems without the complication and steep learning curve of formal systems.*"

Arjen Klomp, Verum's Commercial Manager said: "*We aim to have just a few partnerships with leading software consultancies and I am pleased to welcome Logica to this select group. Logica have the resources and expertise to apply ASD to the biggest and most demanding projects*".

About ASD:Suite

Verum's ASD:Suite software design toolset eliminates all behavioural defects from complex software designs, dramatically cutting the cost of software development, testing and maintenance. ASD:Suite automatic code generation further reduces the cost of software development by 30% per delivered line of code. The key difference between Verum's ASD:Suite and tools that claim to improve productivity is Verum's Analytical Software Design formal verification technology; ASD allows the design of a software system to be mathematically verified as complete and correct, even before a single line of code has been written.

About Logica

Logica is a leading IT and business services company, employing 40,000 people. It provides business consulting, systems integration, and IT and business process outsourcing services. Logica works closely with its customers to release their potential - enabling change that increases their efficiency, accelerates growth and manages risk. It applies its deep industry knowledge, technical excellence and global delivery expertise to help its customers build leadership positions in their markets. Logica is listed on both the London Stock Exchange and Euronext (Amsterdam) (LSE: LOG; Euronext: LOG).
